Subject: Incident EPA Mailbox - Fruitland Magnesium Fire Response

Hi Pete – I understand you are the person that may be able to help set-up an “incident specific” mailbox for Fruitland Magnesium Fire response. This type of mailbox would certainly help simplify communication, and ensure EPA staff working on the response are sending and receiving consistent information without the confusion. Access to the mailbox would only be for EPA staff deployed to the incident. Please let me know if you can assist, or if you know who could.

Thank You,

Mary Matthews
